You can see the percentage of points you shot on any stage or for the match by subtracting the number in parentheses from the total possible. Then divide that number by the total possible. For example, Steve Milz shot SSP/SS in the match at 92.2%... $270 - 21 = 249$. $249 \div 270 = 92.2\%$. A good balance of speed and accuracy is 90 to 95%. If your score is higher, you are doing well. If your score is lower, you should slow down.
