You can see the percentage of points you shot on any stage or for the match by subtracting the number in the parentheses from the total possible. Then divide that number by the total points possible. For example, Ed Whittlesey shot SSR/MM in the match at 94%. That is  $240 - 14 = 226$ .  $226 / 240 = 94\%$ . A good balance of speed and accuracy is 90% to 95%. If your score is higher, then you are shooting too slowly, and should shoot faster. Any lower score than that, and you should shoot more slowly.
