You can see the percentage of points you shot on any stage or for the match by subtracting the number of points from the total possible for that stage or the match. Then divide that number by the total points possible. For example, Ed Fowler shot CDP/EX in the match at 94.36%. That is $195 - 11 = 184$. $184 / 195 = 94.36\%$. A good balance of speed and accuracy is 90% to 95%. If your score is higher, then you are shooting too slowly, and should shoot faster. Any lower score than that, and you should shoot more slowly.
