JUI 18_2010_SCORESHEET.ODS

Stage 1: 3 targets, 3 shots; 2 steel, 1 shot = (3 x3 x 5) + (2 x 1 x 5) =**55**

Stage 2: 6 targets, 2 shots; 1 target, 1 shot = (6 x2 x 5) + (1 x1 x 5)=**65**

Stage 3: 5 targets, 3 shots; = (5 x3 x5) =**75**

Stage 4: 7 targets, 2 shots; = (7 x2 x5))=**70**

Total: **55 + 65 + 75 + 70 = 265**

You can see the percentage of points you shot on any stage or for the match by subtracting the number of points from the total possible for that stage or the match. Then divide that number by the total points possible. For example, **Jeff Monroe ESP / UN** in the match at **99.62%**. That is 265 - 1 = 264. 264/265=99.62%. A good balance of speed and accuracy is 90% to 95%. If your score is higher, then you you are shooting too slowly, and should shoot faster. Any lower score than that, and you should shoot more slowly.**You go JEFF !!**
